

We offer you customized automation solutions

IN COLLABORATION WITH

## WHAT WE DO TO YOUR FUTURE

from the idea to the turnkey solution, quickly and reliably

We introduce new technologies (and new mentalities) to revolutionize the old concept of factory: we offer you the opportunity to obtain the optimal automation for your new projects.

**Do you have specific application needs and would you like our support?**

Contact us for a free meeting, at your location, with our engineers.

Our team will be happy to assist you at 360 °

## SMART AUTOMATION SERVICE

With our **Smart Automation service** we offer you free consultancy, design and turnkey solutions of any automation project at your premises.

Our experts, in collaboration with **our partner Mitsubishi Electric**, design, plan and implement your most innovative, connected and flexible process and automation solutions together with you.

## INCREASE YOUR PRODUCTIVITY

**Start thinking about tomorrow's processes today.** We can support you in planning right from the start and help you boost your production capabilities. To this end, we divide your production into sections, in line with Lean principles.

We then work with you to improve each of these traits, so you can achieve **maximum efficiency and productivity** across the board.

## YOUR BENEFITS

- Production flexibility
- Increase of production and energy efficiency
- Reduction of production times
- Simplicity of technological integration
- On-site consultancy and planning
- On-site service center
- 24/7 support service

## WE KNOW YOUR NEEDS

We become **partners of users and manufacturers of machines and systems** with specific automation needs. Using our experience, we develop and design with you the ideal concepts for logistics, assembly and production for your **Smart Factory**.

**Our experts work with you on site** to plan, configure and implement your process solutions.
